# Project Pipeline

<https://github.com/orgs/lf-energy/projects/2/views/5>

- [Global Granular Certificate Registry](#) is a vendor-neutral, open-source, cloud-native ledger that issues, tracks, and retires Granular Certificates (GCs). Submitted June 11, 2025; currently in LF Onboarding.
- [PowerCore](#) will provide a vendor-agnostic, hardware-generic industrial informatics API for power-electronics systems, enabling portable, maintainable control firmware across diverse microcontroller SoCs. Submitted July 28, 2025; currently in LF Onboarding.
- [Smart HEMS Benchmark](#) will provide an open, standardized, and comprehensive benchmarking framework for residential Distributed Energy Resource (DER) systems, promoting widespread adoption of home and community energy management solutions through transparent performance evaluation and comparison, and advancing innovation and development in the sustainable energy industry. Submitted November 5, 2025 and currently in LF Onboarding.
- AINETUS, open source artifacts from [AI4REALNET](#), aims to develop AI-based solutions addressing critical systems (electricity, railway, and air traffic management), but electrical power grids in particular, modelled by networks that can be simulated, and are traditionally operated by humans, and where AI systems complement and augment human abilities. Currently in LF Onboarding and preparing project proposal.

In discussion with FledgePower

- [Fledge](#) is a leading open source industrial edge platform for industrial data pipelines, intelligent edge applications and ML. Currently an LF Edge Foundation project, in discussions to move into LF Energy

To be presented at next TAC meeting ( 1/13 )

- [CityLearn](#) is an open source Farama Foundation Gymnasium environment for the implementation of advanced controllers for demand side building energy coordination and demand response in cities. It's focus is on residential buildings with the goal to shape the aggregated load profile using local and coordinated DERs. Submitted April 23, 2025; will be presented at the January 13, 2026 TAC meeting.

Older projects in LF Onboarding

- [OneNet Framework](#) - awaiting approval of governance documents
- [pyELQ: python Emission Localization and Quantification](#) - working on name rights issues

# TAC Priorities as aligned to with TAC

## DONE

- ✓ Move to monthly TAC meetings instead of every 3 weeks
- ✓ Start office hours for SIG leaders to share best practices ( working on date/time reschedule )
- ✓ Spin down Data Standards and Tooling and Grid Operations SIGs
- ✓ Move affected project annual reviews to the TAC
- ✓ Security Audits - TAC align on two projects to prioritize ( EVERest, PowSyBL )
- ✓ Project workshops with LF Energy Summit (tentatively Sep 10-11 in Aachen, Germany)
- ✓ Revisit TAC Leadership structure
- ✓ Project landscape <https://landscape.lfenergy.org/> - Update this to reflect the latest projects and how we want to message the ecosystem
- ✓ Include LFESS Working Groups in TAC annual review process.
- ✓ Process for projects to request resources/funding for cloud infrastructure ( <https://github.com/lf-energy/tac/issues/477> )
- ✓ Improve SIG support and interface to the TAC ( <https://github.com/lf-energy/tac/issues/544> )

## CURRENT FOCUSES

- Documentation audit/support ([#546](#)) - anything else before we merge?
- Determine prioritization for Security Audits ([#408](#))
  - TAC aligned during October meeting on pursuing "lighter-weight security threat model reviews"
  - Ask from TSC project leads - which projects are interested ( likely accept up to 5 )
- Project Lifecycle review/refresh ([#650](#))
  - LAST CALL: Add your feedback to the issue above.
  - Will have proposal for January 2026 meeting

## NEXT FOCUSES

- Assemble and execute on a plan to inject fresh energy and increase engagement with the TAC
