Areas the project could use help on

- More visibility (case studies, a blog post or a webinar) to expand the organizational base
- Guidance and support to complete the Incubation requirements and move to the next project phases

Feedback on working with LF Energy

- Positive experience: helpful and collaborative attitude of LF Energy staff and contractors.
- Repository configuration requests have been resolved by LF Energy staff/contractors, but may take longer than necessary. We suggest letting repository maintainers make some basic configuration changes themselves, for example enabling private security reporting.
- Reasons for changes on the LF Energy webpage and project page are not clear or have not been communicated.
- LFX Insights lists Stichting Deltares and Deltares as separate organizations and some contributors under several identities; we would welcome help merging them so that the community metrics are accurate.

Portfolio Review

5:45 pm – 6:00 pm

LF ENERGY

Project Portfolio Review

Reviewing the following projects to potentially Archive.

- NODE Collective - no activity
- covXtreme - Shell project
- RTDIP - Shell project
- LF RegistryOS - Unresponsive to kicking off TSC (accepted in March)
- GridVantage - Potential merge with Arras

Project Health Framework

Question: What does a healthy project look like? Some attributes often considered.

- Code activity
- Organizational Diversity
- Engineering Resourcing
- Release cadence
- Build/security infrastructure
- Downstream usage
- Market fit/need
- Feature/issue backlog

Exercise: What are the key attributes the TAC wants to look at to answer the question.

“Does a given project have the resources needed for sustainable success?”

DISCUSSION: Forming a TAC subgroup to build a health framework.
