Project Pipeline

Presenting at this TAC Meeting

- [Smart HEMS Benchmark](#) will provide an open, standardized, and comprehensive benchmarking framework for residential Distributed Energy Resource (DER) systems, promoting widespread adoption of home and community energy management solutions through transparent performance evaluation and comparison, and advancing innovation and development in the sustainable energy industry. Submitted November 5, 2025.
- [ReLife](#) is an open source Python library to optimize large-scale infrastructure investment decisions. Submitted March 3, 2026.

Presenting at July TAC Meeting

- [RAVEN \(Recognition of Asset and Vegetation for Electrical Network\)](#) project is designed to democratize mobile LiDAR-based analytics for overhead electrical distribution networks by providing openly accessible algorithms capable of automatically detecting, modeling, and classifying power distribution assets as well as surrounding vegetation. Submitted March 3, 2026.

In LF Onboarding

- [EDDIE \(European Distributed Data Infrastructure for Energy\)](#) aims to develop and maintain open-source, decentralised software infrastructure that enables interoperable, secure, and consent-based access to energy data across systems, jurisdictions, and actors. Submitted January 9, 2026.
- [OneNet Framework](#) - awaiting approval of governance documents

Onboarding Paused

- [GridMind's](#) goal is to enable fast transitions between academic proof-of-concept and real-world application by accommodating both diverse power system tooling/data and state-of-the-art DevOps and MLOps tooling. Submitted February 11, 2026.

Project Pipeline (cont)

<https://github.com/orgs/lf-energy/projects/2/views/5>

No longer in LF Onboarding

- [PowerCore](#) will provide a vendor-agnostic, hardware-generic industrial informatics API for power-electronics systems, enabling portable, maintainable control firmware across diverse microcontroller SoCs. Submitted July 28, 2025.

Recommendation to move to Emeritus

- [Project Origin](#) was submitted on July 28, 2025 and finally approved by the TAC in January 2026. Project Origin was unable to garner any interest from potential maintainers and the lead is unable to drive the project on his own.

Update: Security Threat Model Assessment Prioritization [#408](#)

- TAC has an ability to fund up to 5 Security Threat Model Assessments in 2026
- These are “lighter weight” engagements than the previous security audits.
 - Expect 1 hour initial discovery, asynchronous questions via Slack/email, and then time to address any discovered vulnerabilities.
 - Overview of a project recently completing such an assessment -> <https://www.shielder.com/blog/2025/07/materialx-and-openexr-security-audit/>

Projects lined up for threat model assessment:

- CoMPAS
- Power Grid Model
- OpenSTEF
- OpenDSM

Potentially Shapeshifter is the fifth, but if they turn it down we will move forward with four.

Project Lifecycle Guide ([#823](#))

- We are create guide for projects to help them focus on the right things as they move through the lifecycle.
