

Technical Advisory Council (TAC) Meeting

21 July 2026

DLFENERGY

Meeting information

- Meeting to begin at 5:00 pm Central European Time
- Join the meeting at the link in your calendar in [LFX Individual Dashboard](#)
- Any problems with connectivity, you can contact John Mertic from the Linux Foundation at +1 234-738-4571 or Yarille Ortiz at +1 585-967-3585
- Previous TAC Meeting notes, deck, and recording, at <https://tac.lfenergy.org/meetings/>

Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

Agenda

All Times in Central European Time Zone

- 5:00 pm - 5:15 pm - Opening and General Updates
 - TAC member updates and annual review date reminders
 - Resource Request review ([#876](#))
 - Project Pipeline
 - Project Lifecycle Recommendations
 - SCDH move to Emeritus
 - Move to Incubation: Grid2Op [#287](#) and OpenGridFM [#260](#)
 - TAC Chair/Vice Chair Election Update
 - Proposed Revisions to Project Lifecycle
 - Speakers from other LF projects on community building ([#350](#))
- 5:15 pm - 5:35 pm - New Project Proposal - RAVEN [#764](#)
- 5:35 pm - 5:55 pm - Annual Review - SEAPATH [#73](#)
- 5:55 pm - 6:15 pm - Annual Review - GXF [#8](#)
- 6:15 pm - 6:25 pm - Marketing and PR Updates
- 6:25 pm - 6:30 pm - Closing and Next Meeting

TAC Meeting Schedule 2026

The TAC meetings are monthly, on the second Tuesday of the month at 8:00am US Pacific Time/11:00am US Eastern Time unless otherwise noted.

— ~~January 13~~

— ~~February 10~~

— ~~March 10~~

— ~~April 14~~

— ~~May 12~~

— ~~June 9~~

- **July 21 (rescheduled from 14)**

- *August 11 - cancelled*

- September 8

- *September 14 joint Board and TAC meeting at LF Energy Summit*

- October 13

- November 10

- December 8

TAC Resources

- TAC Website - <https://tac.lfenergy.org>
 - Contains all the TAC policies and meeting materials, as well as guides to using the various LF Energy tools
- TAC Overview - https://github.com/lf-energy/foundation/blob/main/overview_deck/LF%20Energy%20TAC%20Overview.pdf
 - Guide for TAC members on their role and how to navigate LF Energy
- Project Resource Request form - https://tac.lfenergy.org/tools/resource_request.html.

Questions/feedback - let us know!

The image shows a screenshot of the LF Energy Foundation TAC website and a presentation slide. The website header includes the LF ENERGY logo, a search bar, and a link for help. The navigation menu lists Home, Getting Involved, Processes, Meetings, Programs, Tools, Resources, and Code of Conduct. The main content area is titled 'LF Energy Foundation TAC' and describes the role of the Technical Advisory Committee (TAC) as defined in the Directed Fund Charter. It lists several responsibilities: coordinating collaboration among Technical Projects, making recommendations to the Budget Committee, electing a chairperson, and creating/amending project lifecycle procedures. The presentation slide, titled 'Technical Advisory Council (TAC) Overview', is dated December 2024 and features the LF ENERGY logo and a page number '1'.

LF Energy Foundation TAC

Per the [Directed Fund Charter](#), the role of the Technical Advisory Committee (TAC) is to facilitate communication and collaboration among the Technical Projects. The TAC will be responsible for:

- Coordinating collaboration among Technical Projects, including development of an overall technical vision for the community;
- Making recommendations to the Budget Committee of resource priorities for Technical Projects;
- Electing annually a chairperson to preside over meetings, set the agenda for meetings, ensure meeting minutes are taken and who will also serve on the Governing Board as the TAC's representative (the "TAC Representative");
- Creating, maintaining and amending project lifecycle procedures and processes, subject to the

Wednesday 5									
9:00am - 10:00am • Grid Simulation and Modeling SIG Bi-Monthly Meeting									

Resource Request review ([#876](#))

Submitted yesterday by SEAPATH.

ACTION: TAC Review/Vote per [Resource Request Process](#).

ebail opened 1d ago

Request category

Release engineering support (CI/CD optimization, build tooling, etc.)

Why is this needed?

Hello,

We identified on SEAPATH roadmap the use of [virtual CI](#) to run some tests on a cloud infrastructure rather than real hardware. Real hardware will still be used for performance purpose.

We highly used GitHub runners including the free and large runners, provided by the Linux Foundation. It result that there are quickly limited for our usage (nested and parallel virtualization), and notably:

- The instability of the single core CPU performance, and the performance globally
It happened regularly that the performances of a runner are dropping for a same workflow. One task can be executed in 1 min, up to 10min. The duration of a workflow (ex: SEAPATH Debian images build + virtual cluster test), is highly fluctuating from 30min (best) to more than 2 hours (worst).
- The impossibility to test VMs deployed in virtual hypervisors

It is possible to deploy VMs in the hypervisors of the virtual cluster, but their performances are highly dropping (VM start needs a few hours). It is not possible to execute in it tests as we are doing currently on our "physical" machines (Welotec, RTE CI).

- Instability on the virtual hypervisors

Unexpected behaviors are encountered with the virtual hypervisors deployed. Specially, the reboot is unstable, and regularly (1 of 2 reboot), is blocked by a kernel process (kworker) and so raise an Ansible error and makes yo fail the workflow in globally.

- The cost
For a 8 cores/32GB of RAM runner, GitHub taxes 0.032ct/min of runner work. If we add Yocto CI + Ansible CI, we end up to 100 CI jobs per month, with an average of 40min per job, and so a total of \$130 per month.

So these limitation raises the question of an alternative of GitHub runners. We are thinking about [Amazon AWS EC2](#), with an orchestrator to run multiple jobs in concurrency.

Please give us guidance on that and tell us if this could be funded by LF Energy.

Thanks,

Eloi Bail
LF Energy SEAPATH TSC Chair

Project Pipeline

<https://github.com/orgs/lf-energy/projects/2/views/5>

In LF Onboarding

- **EDDIE (#719)**
 - Waiting on project to clear up trademark issues
- **OneNet Framework (#112)**
 - Working through naming and scope issues identified.
- **GridMind (#750)**
 - Picking up on LF Onboarding in September

Presenting today

- **RAVEN (#764)**
 - Project will be renamed due to potential naming conflicts found during knockout search

Lifecycle Change recommendations

Recommendation to move to Emeritus

- [SC Decarbonisation Hub](#) was contributed by Shell and approved in Sept 2024. The project doesn't have any current maintainers and after speaking with Shell, they recommend moving the project to Emeritus.

Presenting to move to Incubation

- Grid2Op [#287](#)
- OpenGridFM [#260](#)

TAC Chair/Vice Chair Election Update

Per the LF Energy Election Process (<https://github.com/lf-energy/foundation/blob/main/elections.md>) and TAC Roles guidelines (https://tac.lfenergy.org/process/tac_roles.html) the TAC Chair and Vice Chair election is set for July.

ACTION: TAC Voting Members to consider taking on the Chair or Vice Chair role.

Proposed Revisions to Project Lifecycle

[#846](#)

- Add requirement for Sandbox stage acceptance of 'Have at least one active maintainer, preferably several.'
- Reference LF Europe in addition to LF for marks and accounts transfers.

[#847](#)

- Add six-month timeline for newly accepted TAC projects to finish onboarding.

DISCUSSION: Approval of changes, take to an LFX Vote.

Speakers from other LF projects on community building ([#350](#))

ACTION: Please add any speakers/topics to cover to the issue. If nothing by end of September, will close.

New Project Proposal:
RAVEN (Recognition of Asset and Vegetation for
Electrical Network)

SEAPATH

High availability real-time hypervisor for hosting digital substation virtualized protection and control applications (vPAC)

Description

SEAPATH, Software Enabled Automation Platform and Artifacts (Therein), aims at developing a reference design and industrial-grade open source real-time platform that can run virtualized automation and protection applications (for the power grid industry initially, and potentially beyond). This platform is intended to host multi-provider applications.

SEAPATH meets the high requirements of substation reliability, performance, and availability.

Key features include:

- Hosting of virtualization systems: a heterogeneous variety of virtual machines can be installed and managed on the platform.
- High availability and clustering: machines on the cluster are externally monitored in order to guarantee high availability in case of hardware or software failures.
- Distributed storage: data and disk images from the virtual machines are replicated and synchronized in order to guarantee their integrity and availability on the cluster.
- Intelligent virtual network: the virtualisation platform is capable of configuring and managing the network traffic at the data layer level.
- Administration: the system can be easily configured and managed from a remote machine connected to the network, as well as by an administrator on site.
- Automatic update: the virtualisation platform can be automatically updated from a remote server.

 - Open Source Summit North America (Denver, Co)

SEAPATH from Early Adoption to Graduated [1/]

- SEAPATH in Early adoption **since March 2023** ✓
- Achievement of the OpenSSF Best Practices badge at the [‘Gold’ level](#): **87% done**
- Have fulfilled or are on track to complete the growth plan defined in the Early Adoption stage proposal. ✓
- Have a healthy number of contributions or committers from at least three organizations, with any single organization not composing more than 50% of the contributions or committers. Committers must be identified within the project in a COMMITTERS file. ✓
- Have a public list of project adopters for at least the primary repo (e.g., ADOPTERS.md or logos on the project website). ✓

SEAPATH from Early Adoption to Graduated [2/]

- Achievement of the OpenSSF Best Practices badge at the [‘Gold’ level](#).
 - **87% done**
 - Discussion on
 - Working build system: The project MUST have a reproducible build
 - Automated test suite: work to be done on
 - Ansible (Molecule)
 - python3-setup-ovs
 - vm-manager
 - cockpit plugins

SEAPATH from Early Adoption to Graduated [3/]

- Have fulfilled or are on track to complete the growth plan defined in the Early Adoption stage proposal. ✓
 - Communication around SEAPATH v.1.0 ✓
 - Lot of communication & talks on SEAPATH 1.X & 2.X
 - Individual & group discussion with SEAPATH TSC voting members ✓
 - More companies joining TSC and Roadmap workshop
 - Third party integration ✓
 - Integration with HW manufacturers, SW providers and services companies
 - Attract more utilities ✓
 - Alliander, Elia, Hydro-Québec, National Grid

SEAPATH from Early Adoption to Graduated [4/]

- Have a healthy number of contributions or committers from at least three organizations, with any single organization not composing more than 50% of the contributions or committers. Committers must be identified within the project in a COMMITTERS file. ✓
 - <https://github.com/seapath/.github/blob/main/COMMITTERS.md>

SUSE	3 - 0%

OLFX Insights

The Linux Foundation ®. All rights reserved. The Linux Foundation has registered trademarks and uses trademarks.

Note: many commits done by Savoir-faire Linux in **2026** are **sponsored**

- Suse SLES support
- Support of Qualcomm IQ9

SEAPATH from Early Adoption to Graduated [6/]

- Have a public list of project adopters for at least the primary repo (e.g., ADOPTERS.md or logos on the project website) 
- <https://github.com/seapath/.github/blob/main/ADOPTERS.md>

Areas the project could use help on

- Help to organise dedicated events (Workshop)
- Share REX on tools
 - Guidance on documentation (ex: move from confluence)
 - Tools to manage Roadmap
 - Tools to organize workshop (ex: brainstorming)
- Help on project management
 - Management of TSC & Voting process
 - Management of meetings

Feedback on working with LF Energy

- Good promotion of the project (social network & events)
- Lot of value to the project regarding life cycle maturity, openSSF badging and security audit
- Issues with SIG
 - Digital Substation SIG impact was very limited
 - Lot of issues to get SEAPATH project reviewed (last review done on Jan. 2025)
- Technical support is sometimes slow
 - ex: 6 months to have access to cloudflare for <https://releases.seapath.org>

DLFENERGY

September Joint Governing Board/ TAC Meeting

For planning purposes, the September meeting of the LF Energy TAC will be a joint Governing Board / TAC meeting.

Date: 14 September 2026

Time: 16:00-17:30 CET

Location: Erfurt Room at 50Hertz Headquarters (Heidestraße 2, 10557 Berlin).

Dinner to follow immediately after the meeting.

Next TAC Meeting

The following meeting of the LF Energy TAC is scheduled for September 8, 2026 at 5:00 pm Central European Time. Agenda tentatively to include:

- General Updates
- Annual Review: p-SWAMP [#585](#)
- Annual Review: Battery Data Alliance [#57](#)
- Annual Review: RTC-Tools [#344](#)
- Annual Review: OperatorFabric [#71](#)
- Marketing/PR/Events update

To add agenda items, go to <https://github.com/lf-energy/tac/issues/new/choose>.

You can review the TAC Agenda at <https://github.com/orgs/lf-energy/projects/2/views/1>
